Re: Water Expanded RKS; PM #587

Dear Howard:

I am sending the disclosure named above for preparation of a patent application. We regard this as an important case. Also enclosed are copies of some pertinent reports and prior art patents; the file for case PM #562 should also be examined. I am looking for a better reference regarding the basic RKS process. A list of "claims" drawn up by Mr. Madures is enclosed to give you an idea of what he thinks the invention is. Copies of records to help establish inventorship (once the invention is defined) are enclosed, and more may follow. Please let us know what further information you need.

Sincerely,

G. Esler Inskip
Assistant Patent Officer
